

IRON POWER SERVICES

PROGRAM MANAGEMENT

Iron Power Services provides specialty support services to help utilities and energy providers manage an increasing portfolio of work and/or large scope projects. Our experienced technical and professional management team is capable of overseeing projects from concept through completion. Iron Power Services assists with assessment, planning, construction, start-up, operations and maintenance as well as staff augmentation support for program/project management and engineering services including:

- Constructability Reviews
- Estimating
- Scheduling
- Project Controls
- Document Control
- Administrative Support
- Cost & Performance Audits
- Design
- Materials & Logistics Management

As part of M. J. Electric, LLC (MJE) Iron Power Services delivers unique specialty and support services that are above and beyond what is normally provided by other program and project management firms. MJE is a nationally recognized prime electrical contractor in the electric transmission, substation, distribution, renewable energy, power, industrial, instrumentation, telecommunications, project management, and civil/foundation construction industries. This construction background results in approaching project management through a field execution perspective. This differentiator enables Iron Power Services to identify and avoid many of the risks and challenges experienced in the costliest phase of a project—the construction phase.
