

M. J. ELECTRIC

ELECTRICAL UTILITY CONTRACTOR

M. J. Electric, LLC (MJE) excels in the techniques required for utility construction and has demonstrated that ability by completing projects nationwide in the most difficult terrains and circumstances. From new installations to general maintenance, expansion, and rebuild work, MJE has successfully constructed thousands of miles of **transmission** lines and hundreds of high-voltage switchyard and interconnect **substations** in locations ranging from remote environments to dense urban areas. MJE performs all tasks in **distribution** construction including responding for emergency power restoration. That experience offers our customers a valuable combination of expertise and experience tailored to the unique needs of utilities. We offer a broad range of overhead and underground electrical construction and maintenance services including:

- Line Relocations & Reconductoring
- Pole and Lattice Erection & Replacements
- GIS & HVDC Substation Construction
- SVC & FACTS System Construction
- SCADA Installations
- Foundations, Excavation & Fencing
- Transformer Installation and Maintenance
- Large Transformer/Equipment Moves and Logistics
- Above/Below Grade Raceway and Grounding
- Power Plant Connections
- Renewable Energy
- EPC Project Management

Our teams use innovative approaches to provide planning and cost-effective solutions that address specific project needs. MJE has access to specialized techniques and technologies, such as energized services, to complete projects more efficiently, safely, and cost-effectively. Traditional energized methods are used in conjunction with the proprietary LineMaster™ Robotic Arm to maintain live lines and perform energized reconductoring services.
