

M. J. ELECTRIC

INDUSTRIAL, POWER & CONTROLS

M. J. Electric, LLC (MJE) is recognized as a premier industrial and power electrical contractor nationwide. Our expertise includes construction in the electrical utility, heavy industrial, refinery, instrumentation, mining, and pulp & paper markets.

We have decades of experience in the construction and maintenance of **power generating** facilities. Our expertise includes traditional fossil fuel and natural gas steam generation plants, as well as renewable energy sources such as hydroelectric and biofuels. No matter the power source, MJE has the equipment, crews, and resources necessary to deliver efficient, environmentally responsible power plant construction.

We recognize the special considerations involved in **industrial** manufacturing projects and the demanding environments in which they occur. Whether it is a fast-paced turnaround, new construction, renovation, or routine maintenance, our highly skilled project managers and craft leadership understand those unique project requirements.

MJE provides new facility construction, renovations, and upgrades with the benefit of complete constructability & design **BIM services**. Our experience ranges from small installations to large-scale, complex projects constructed for EPC & general contractors, industrial facility owners, local governments, and developers. We also participate in long-term maintenance contracts with our customers.

We recognize the challenges faced in the industrial sector's **steel**, **petrochemical**, and **paper** industries. We have completed major projects as well as held full-time maintenance contracts. For projects involving tight shutdown schedules, we use processes to reduce downtime and are prepared to support both major and small turnarounds.

We offer **mining** electrical services, ranging from small-scale electrical setup to high voltage industrial electrical installations. Our team of expert supervision and management personnel provide innovative electrical solutions to the unique situations faced by our industrial and mining customers.
